THE COMPANY

Feno GmbH was founded back in 1999 by five ambitious nurserymen. The name is a German acronym for Promoting and Developing New Varieties of Fruit. The founding of Feno was a response to the need to cater for the greatly changed circumstances both in terms of the rules and regulations governing tree nurseries and in terms of the entirely new developments in the area of variety and trademark protection.

Feno is a member of CIVI Italia: the national consortium of nurserymen for quality and production of certified propagation material from fruit, citrus, strawberry, olive and garden plants.

Feno GmbH wurde im Jahr 1999 von 5 ambitionierten Baumschulern gegründet. Der Name steht für Förderung und Entwicklung Neuer Obstsorten. Mit der Gründung von Feno hat man auf die Notwendigkeit reagiert den stark veränderten Umständen, sowohl was die Regelungen bzw. Vorschriften für das Baumschulwesen betrifft, als auch was die gänzlich neuen Entwicklungen im Bereich des Sorten- und Markenschutz betrifft, gerecht zu werden.

Feno ist Mitglied von CIVI Italia: der nationalen Organisation der Baumschuler für Qualität und Produktion von zertifiziertem Vermehrungsmaterial von Obst-, Zitrus-, Erdbeer-, Oliven- und Gartenpflanzen.

Feno è stata fondata nel 1999. Il nome Feno significa Costituzione e Promozione di Nuove Varietà Frutticole. Feno è una „risposta” alle esigenze, sia di regolamenti vivaistici nella comunità europea, nonché alle esigenze che nascono dall'amministrazione di marchi e brevetti.

Feno è membro del CIVI Italia: Il Consorzio nazionale dei Vivaisti, per la qualità la produzione di materiale di propagazione certificato di fruttiferi, agrumi, fragola, olivo e piantine orticole.

Gala Venus 'fengal'(s) A

PARENTS & ORIGIN

Gala mutant by Feno® GmbH

FLOWERING TIME

middle to late
mittelspät
medio-tardivo

PICKING TIME

end of august
Ernte Ende August
raccolta fine agosto

GROWTH

weak to medium vigour
Wuchs schwach bis mittel
vigore debole-medio

POLLINATORS

Granny Smith, Red Del., Evereste, Prof. Sprenger.

TASTE

Sweet, aromatic, crispy and juicy.
Süß, aromatisch, knackig, saftig.
Dolce, aromatico, croccante, succosa.

APPEARANCE

Red intensive and vivid overcolour, particularly striped. The overcolour covers in average 80% of the fruit surface. Fruits are uniformly coloured, lightly elongated, medium-large. Smooth skin.

Deckfarbe: intensives, lebhaftes Rot; ausgesprochen gestreift. Die Fruchtfarbe bedeckt im Durchschnitt 80% der Fruchtoberfläche. Die Früchte am Baum sind einheitlich gefärbt, leicht länglich und mittel-groß. Glatte Schale.

Sovra colore: rosso intenso, vivace; particolarmente striato. Il sovra colore copre in media 80% della superficie del frutto. I frutti sono uniformemente colorati, leggermente prolungati, e medio grandi. Buccia liscia.

CHARACTERISTICS

Gala Venus 'fengal'(s) A shows a good stability and is a very typical Gala.

Gala Venus 'fengal'(s) A zeigt eine gute Stabilität und ist ein sehr sortentypischer Gala.

Gala Venus 'fengal'(s) A mostra una buona stabilita genetica ed è un Gala "tipico".

Gala Decarli 'fendeca'(s)

PARENTS & ORIGIN

Gala mutant discovered by Alberto Decarli and Reinhard Kaneppele (South Tyrol), Feno GmbH

FLOWERING TIME

middle to late
mittelspät
medio-tardivo

PICKING TIME

end of august
Ernte Ende August
raccolta fine agosto

GROWTH

weak to medium vigour
Wuchs schwach bis mittel
vigore debole-medio

POLLINATORS

Granny Smith, Red Del., Evereste, Prof. Sprenger.

TASTE

Sweet, aromatic, crispy and juicy.
Süß, aromatisch, knackig, saftig.
Dolce, aromatico, croccante, succoso.

APPEARANCE

Overcolour: red intensive, blushed and lightly striped. Fruits are spherical-elongated. Smooth skin.

Deckfarbe: sehr intensives, verwaschenes bis leicht gestreiftes Rot. Die Form ist kugelig bis länglich, die Schale glatt.

Sovracolore: rosso intenso, slavato e leggermente striato. La forma è sferoidale-conica, la buccia è liscia.

CHARACTERISTICS

The colour is striped at the beginning and uniform at maturity. The colour covers nearly the total surface of fruits. Nevertheless the colour is very intensive. Gala 'fendeca'(s) remains a typical Gala due to very pronounced lenticels and presence of the Gala typical silverfilm. The percentage of overcolour (colour development) is very high also in areas with difficult of colouring and inside the tree. The colour comes very early (mid of July). Gala 'fendeca'(s) differs for its excellent stability. We don't note reversion, which is normally present on Gala. Colouring of fruits is uniform and stable.

Die Fruchtfarbe ist anfangs gestreift und bei Vollreife flächendeckend rot und bedeckt beinahe die gesamte Fruchtoberfläche. Trotz intensiver Färbung bleibt Gala 'fendeca'(s) ein typischer Gala (ausgeprägte Lentizellen und Silberfilm). Der Anteil an Deckfarbe ist sehr hoch auch in schlechten Farblagen und im inneren des Baumes. Die Färbung kommt sehr früh (Mitte Juli). Gala 'fendeca'(s) unterscheidet sich vor allem durch seine exzellente Farbstabilität. Es gibt keine Regression wie wir sie ansonsten bei Gala kennen. Die Ausfärbung der Früchte ist gleichmäßig und stabil.

Il colore è striato inizialmente e in fase di maturazione completamente rosso. Il colore copre quasi tutta la superficie del frutto. Nonostante la colorazione intensa rimane un tipico Gala a causa delle lenticelle molto pronunciate e la presenza del tipico silverfilm. La percentuale di sovracolore è elevata anche nelle zone di coltivazione meno vocate e all'interno dell'albero. La colorazione è precoce (a partire da metà luglio). Gala 'fendeca'(s) si distingue per la sua stabilità genetica eccellente. Non si notano regressioni (presenti normal-mente sulla Gala). La colorazione dei frutti è uniforme e stabile nel tempo.

Gala 'fenstripe'(s)

PARENTS & ORIGIN

Mutation of Gala Venus 'fengal'(s) A
by Feno® GmbH

FLOWERING TIME

middle to late
mittelspät
medio-tardivo

PICKING TIME

end of august
Ernte Ende August
raccolta fine agosto

GROWTH

weak to medium vigour
Wuchs schwach bis mittel
vigore debole-medio

POLLINATORS

Golden Delicious, Red Delicious, Granny Smith,
Evereste, Prof. Sprenger.

TASTE

Sweet, aromatic, crispy and juicy.
Süß, aromatisch, knackig, saftig.
Dolce, aromatico, croccante, succosa.

APPEARANCE

The intense red overcolour is clearly striped, darker red than Gala Venus 'fengal'(s) A. The fruits are medium-large, elongated with a smooth skin.

Die intensiv rote Deckfarbe zeigt eine deutliche Streifung, dunklerer Rot-Ton als bei Gala Venus 'fengal'(s) A. Die Form ist mittelgroß und hochgebaut, die Schale ist glatt.

Sovra colore rosso intenso particolarmente striato, rosso più scuro della Gala Venus 'fengal'(s) A. Forma medio grande, cilindrica allungata. Buccia liscia.

Gala 'fenstripe'(s) Guyotree® - Piedmont

Gala 'nikangie'(s)

PARENTS & ORIGIN

Gala mutant by Vivai Agosti

FLOWERING TIME

middle to late
mittelspät
medio-tardivo

PICKING TIME

end of august
Ernte Ende August
raccolta fine agosto

GROWTH

weak to medium vigour
Wuchs schwach bis mittel
vigore debole-medio

POLLINATORS

Granny Smith, Red Del., Evereste, Prof. Sprenger.

TASTE

Sweet, aromatic, crispy and juicy.
Süß, aromatisch, knackig, saftig.
Dolce, aromatico, croccante, succosa.

APPEARANCE

Blushed with light stripes, vivid red colour with a better colouring than the other known Gala clones. Lightly elongated, large fruits with smooth skin.

Verwaschen und leicht gestreift, lebhaftes Rot mit besserer Ausfärbung als die bisherig bekannten gestreiften Gala. Leicht längliche, große Form mit glatter Schale.

Sovra colore slavato con leggera striatura, rosso vivo, con una colorazione migliore degli altri cloni di Gala conosciuti. Forma leggermente prolungata e grande. Buccia liscia.

CHARACTERISTICS

Ideal for difficult colouring areas, excellent pack out, for all those who do not want to give up a typical Gala.

Ideal für schlechtere Farblagen, sehr gutes Pack Out, für alle die nicht auf einem sortentypischen Gala verzichten wollen.

Ideale per le zone di colorazione meno vocate, ottimo pack out, per tutti coloro che non vogliono rinunciare ad un Gala tipico.

Gala 'fenplus'(s)
